THE HAMPTONS

Sea, sand and sky, this coastal getaway gives East Coast urbanites a respite from city life with low-key seafood shacks, eclectic antique shops, placid bays and quaint inns. From Amagansett to Sag Harbor to Montauk, and every relaxed town in between, extraordinary homes in classic traditional Hamptons and ultramodern styles, adorn its quiet shores.

The Hamptons

Entry to an elevated oceanfront house that appears to float above the dunes on Long Island.

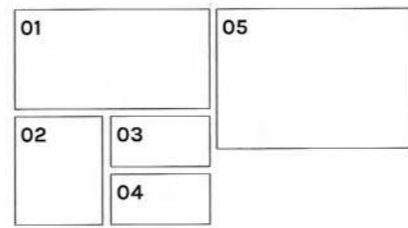

“Ensuring the correct execution of the design is just as important as the design itself.”

BARNES COY ARCHITECTS

Barnes Coy Architects is an award-winning architecture firm known for innovative design. From their offices in Bridgehampton and Manhattan, they have completed more than 250 projects in the Hamptons, Manhattan, Colorado, Florida, the Caribbean and Central America.

The firm's design philosophy is simple: Architecture begins with the site. The site, its context and the program of clients' requirements are the primary generators of the design response. This approach creates an opportunity for the building to be unique to its purpose and place, providing spaces that serve and inspire the occupants. Barnes Coy has built 24 of their designs in the dual role of architect and construction manager. This has made the principals Robert Barnes and Christopher Coy knowledgeable in the complexities and practical realities of building construction. They believe that ensuring the correct execution of the design is as important as the design itself. In accordance with this concern, the firm maintains a strong presence

CAPTIONS & CREDITS

01.The terrace of a curved house, inspired by the shape of the Nautilus shell, overlooks a harbor in the Hamptons. **02.**Transparent glass cube enclosing the living space mediates between the pool and the harbor. **03.**Outdoor living room, with the main living space and cantilevered master bedroom to the right. Winner of the 2011 Innovation in Design Award. **04.**View from the upper terrace, showing the master suite as a suspended teak box within an open-plan living space. **05.**Two-story cantilevered box of this hilltop house frames distant ocean views.

on site throughout the construction phase. The culture behind the firm's success in achieving the highest standard of design is that no one cares more about the project than the architect. Barnes and Coy are personally involved in every project—from concept to detailing to construction—to ensure the best realization of clients' requirements. This is the client's assurance that good design creates value.

ROBERT BARNES
Robert Barnes, AIA, was educated at Georgetown University, and studied architecture at Cornell University, where he received his B. Arch. He has worked for DePolo Dunbar, Norman Jaffe AIA and Daniel Goldner AIA.

CHRISTOPHER COY
Christopher Coy, AIA, was educated at New York University and studied architecture at the Spitzer School of Architecture, where he received his B. Arch. He has worked for Naomi Leff Associates, Thierry Despont and Gwathmey Siegel Architects.
